

PROFILE OF SHEAR DESIGN LIMITED

CONSULTING STRUCTURAL AND CIVIL ENGINEERS

The ethos of Shear Design is to provide economical solutions to all designs, whether large or small with emphasis on practicality, build ability, quality of information and the ability to positively interact with the design team. This is applied from inception through to completion on site.

Our commitment to projects will ensure the Client key objectives of providing a quality product are achieved allowing adequate time for innovation, investigation and evaluation.

The Company offers value engineering solutions to all projects using a fully computerised design and draughting service. Our resourcing ranges from Chartered Engineers to Senior Technicians. Our extensive experience has enabled us to provide expert witness services within the construction industry.

- Institution of Structural Engineers (Membership: 01072507)

CORE VALUES

Five key values drive our business:

Strive: We strive towards excellence by building our working principles into everything we deliver; and into how we work as an organisation to achieve individuality in every project we undertake.

Hands On: The accumulation of our vast knowledge base, experience and diverse range of skills is achieved by an entirely hands-on approach, ensuring every project is completed to a consistently high standard.

Efficient: Our continual training and development programme, combined with the most up-to-date software available to us, has ensured that our Client's requirements are met with minimum waste of time, effort and skill.

Aware: We continue to adapt and develop our technical skills and knowledge whilst respecting our responsibilities for sustainability, environmental impact and health and safety issues.

Reliable: Our proven track record and established technical procedures have ensured that our Client's projects are completed on time and within budget.
